INDEPENDENT AUDITOR’S OPINION

To management of
Fundo Brasileiro para a Biodiversidade - FUNBIO
Rio de Janeiro - RJ

- 1 We have examined the Balance Sheet of Fundo Brasileiro para a Biodiversidade - FUNBIO, as of December 31, 2003, and the related statements of operations, changes in net assets and cash flows for the year then ended, expressed in reais and prepared under the responsibility of the management of the Fund. Our responsibility is to express an opinion on these financial statements.
- 2 Except for the mentioned in paragraph 3, we conducted our audit in accordance with auditing standards generally accepted in Brazil, which include: (a) planning of the audit, considering the materiality of the amounts presented, the volume of transactions and the entity’s accounting and internal control systems of FUNBIO; (b) examining, on a test basis, the evidence supporting the amounts and disclosures in the financial statements; and (c) assessment of the accounting practices used and significant estimates made by FUNBIO’s management, as well as the presentation of the financial statements taken as a whole.
- 3 FUNBIO has recorded costs during the 2003 year in the amount of R\$2,475 thousand related to projects based on the financial statements of the projects “DFP” signed by its responsible persons and verified by the development department. As the original documents in the amount of R\$1,861 thousand are kept in the project locations once these documents are not owned by FUNBIO rather than by the executing companies, our audits have included the analysis and verification of not certified copies.
- 4 In our opinion, except for the effects that might result of the issues mentioned in paragraph 3, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of Fundo Brasileiro para a Biodiversidade - FUNBIO as of December 31, 2003, the results of its operations, the changes in net assets and the cash flows for the year then ended in accordance with the accounting practices adopted in Brazil.
- 5 As mentioned in the note no. 2 (i) letter i to the financial statements, the company has adopted in this year new criteria for recording and recognizing funds repassed to the projects, donations of partners linked to projects, advances to projects and account for.

FUNDO BRASILEIRO PARA A BIODIVERSIDADE - FUNBIO

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEARS ENDED AT DECEMBER 31, 2003 AND 2002

(Expressed in thousands of Brazilian reais and in thousands of U. S. dollars)

1 OPERATIONS

FUNBIO has a general objective to contribute to environmental conservation and to the sustainable use of the Brazilian bio-diversity. As a not-for-profit organization, its specific objective is to operate a fund oriented to providing financial and material support to initiatives associated with environmental, conservation and the sustainable use of the bio-diversity located in the national territory, as provided under the Convention on Biological Diversity and also under the National Program for Biological Diversity, as well as in compliance with the guidelines established by the competent government agencies.

The main fund sources are: (a) income from its investments and financial applications inside and outside Brazil; (b) donations from de World Bank/Global Environmental Facility (GEF), and/or from individuals or public/private entities, foreign or local, and from international entities; and (c) payment for services rendered related to the attainment for the FUNBIO's purposes.

On October 1, 1999 the Fund obtained legal autonomy and started to control its operations as of July 1, 2000.

2 SUMMARY OF SIGNIFICANT ACCOUNTING PRATICES

Fundo Brasileiro para Biodiversidade – FUNBIO adopts the accounting practices as provided for in the Brazilian Corporate Law, adapted to the legal provisions and regulations applicable to the non-profitable civil associations.

The most significant accounting practices adopted in the preparation of the financial statements may be summarized as follows:

a Cash and cash equivalents

Represent the cash balance in bank and financial investments of immediate liquidity, which are registered at cost, added of the income verified until the date of the balance, not in excess of the respective market values.

b Investments in foreign currency

Are represented substantially by deposit certificates with bankers abroad, with fixed deadlines and added of income proportionally to the date of the balance, without exceeding the market value. The amounts are converted into reais based on the commercial US dollar purchase rate on the date of the balance.

c Investments in foreign managed securities portfolio

Are recognized based on the values reported in the U.S. dollars statement prepared by AIG Private Bank (funds manager) as at the balance sheet date, which includes the invested amount plus accrued income net of any provision for loss, when informed by the funds manager, and are translated into reais by using the official purchase exchange rate at the date of the balance sheet.

d Advances to projects

Represent advances related to the partnership agreements and funding of projects for the preservation and sustainable use of biodiversity.

e Fixed assets

Are stated at acquisition cost less accumulated depreciation. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets.

f Project obligations

The obligations with contributions to the projects are accounted for as the projects occur. The Fund makes advances for the projects, and are registered as advances in the current assets and as contra entry, account for in the current liability related to expenditures to be evidenced from 2003 fiscal year.

g Revenues and expenses with projects

Recognized by accrual basis, according to the execution of the projects and the accountability of the fund, by the executor beneficiaries of the projects.

h Translation into U.S. dollars (US\$)

The amounts of the Balance Sheet were converted into US dollars based on the exchange rate on December 31, 2003 and 2002 (R\$ 2.8884 and R\$ 3.5325 respectively, to US\$ 1). The amounts of the statement of income have been converted at the average dollar exchange rate in the fiscal year. The adjustments related to the conversion into US dollars are included in net assets.

I Change of accounting policies

Funds of Funbio

During the 2003 fiscal year, the allocated amounts repassed and recorded in the expenses are related to the funds of Funbio. Such expenditures are recognized in the income statement upon the disbursement. However, until 2002 fiscal year, such expenses were recorded upon the account for.

Funds of Third Parties

The donations of partners linked to projects and the respective advances related to 2003 fiscal year are recorded and controlled on balance sheet accounts, current liabilities and assets, respectively. Upon the account for, there is a match between assets and liabilities, and there is not effect on the statement of operations. However, until December 31, 2002, such funds received and repassed were controlled on balance sheets and allocated to the statement of operations upon the account for.

3 INVESTMENTS IN FOREIGN MANAGED SECURITIES PORTFOLIO

These investments refer to sundry financial investments in fixed and variable securities, currency and operations with derivative instruments, made by AIG Private Bank in the international market. The balance is shown as follows:

	R\$		US\$	
	2003	2002	2003	2002

Total	21,895	7,581	13,569	4,698	8,326	2,883

a Agreement executed in US dollars.

b Agreement executed in reais.

Amounts in U.S. dollars were translated using the exchange rate in effect at year-end.

There is no information about project ARPA on notes 4, 5 and 6, due to such project was subject to a specific report.

FUNBIO hires external advisors for the final evaluation, including for the physical and financial evolution upon the completion of each project.

7 NET ASSETS

Comprised by donations from Banco Mundial and non-governmental organizations to subsidize projects oriented to the conservation and sustainable use of the biodiversity.

8 PRIOR YEAR ADJUSTMENT

It mainly relates to the adjustment of wrongful appropriation accountings in respect to pooling of allocated amounts for the projects in the prior fiscal years.
